

Your brain controls every organ, muscle, gland, cell via the spinal cord. The spinal cord is protected by

your vertebrae. If a vertebra misaligns and causes nerve pressure, it is called a **SUBLUXATION**, which will cause ill health. Specifically correcting **SUBLUXATIONS** by hand can restore health and reconnect the brain to the rest of the body.

Dr. Torsten Stein, B.S. D.C. 2735 W. Union Hills Dr. PHX, AZ 85027 623.521.3981
